

June 22, 2020

Residents, Family Members and Neighbors,

This morning Villages of Lake Highlands was informed that two of our residents have tested positive for COVID-19. The tests results stemmed from our routine screening protocols. Each of the residents are asymptomatic and have never presented any of the classic COVID-19 symptoms. We are in the process of re-testing the residents as part of our established protocols.

We continue to follow our infection prevention protocols and guidelines established by federal, state, and local public health officials. We are in current communication with the Dallas County Health Department and the State of Health and Human Services Commission in coordinating our response. At this early stage there are many unknown issues; accordingly, we will not speculate on such matters. However, as stated in prior correspondence we will keep you informed as information becomes available.

Thank you for your support.

Villages of Lake Highlands Team
